

III. REMARKS

Claims 1-20 are pending in this application. By this amendment, claim 1 has been amended. Applicants are not conceding in this application that those claims are not patentable over the art cited by the Office, as the present claim amendments and cancellations are only for facilitating expeditious prosecution of the subject matter. Applicants do not acquiesce in the correctness of the rejections and reserve the right to present specific arguments regarding any rejected claims not specifically addressed. Further, Applicants reserve the right to pursue the full scope of the subject matter of the original claims in a subsequent patent application that claims priority to the instant application. Reconsideration in view of the following remarks is respectfully requested.

In the Office Action, claims 1, 4 and 13 are requested under 35 U.S.C. §112, first paragraph, as allegedly failing to comply with the written description requirement. Claim 1 is rejected under 35 U.S.C. §112, second paragraph, as allegedly being indefinite. Claims 1-2, 9-11, 14-16 and 18-20 are rejected under 35 U.S.C. §103(a) as allegedly being unpatentable over Okano *et al.* (U.S. Patent Pub. No. 2002/0062485 A1), hereafter “Okano,” in view of Aoyama *et al.* (U.S. Patent Pub. No. 2003/0199265 A1), hereafter “Aoyama.” Claims 3-7, 12-13 and 17 are rejected under 35 U.S.C. §103(a) as allegedly being unpatentable over Okano in view of Aoyama and further in view of Matsuda (U.S. Patent Pub. No. 2002/0133573 A1), hereafter “Matsuda,” and further in view of Poger (U.S. Patent No. 6,772,420 B1), hereafter “Poger.”

A. REJECTION OF CLAIMS 1, 4 AND 13 UNDER 35 U.S.C. §112, FIRST PARAGRAPH

The Office has objected to claims 1, 4 and 13 as allegedly not satisfying the written description requirement. Specifically, the Office objects to the pre-existing pool of claim 1. Applicants have amended claim 1 to more clearly correspond to the embodiment in para. 0042 in which the device entry system has a generation system that generates a unique device identifier for the generated device entry. The Office further objects to the limitation of claim 1 that the device identifier not be the phone number. Applicants respectfully submit that the limitation is subsumed in the statement that some devices do not have readily available communications related information. In addition, Applicants respectfully direct the Office to the device identifier column in the table of Fig. 7, in which none of the entries is a telephone number. The Office still further objects to the limitation of claims 4 and 13 that the device type not be the manufacturer. Applicants respectfully direct the Office to the device type column in the table of Fig. 7, in which none of the entries is the manufacturer. Applicants respectfully submit that the claims satisfy the written description requirement and request that the Office withdraw its rejections.

B. REJECTION OF CLAIM 1 UNDER 35 U.S.C. §112, SECOND PARAGRAPH

The Office has stated that claim 1 is indefinite for failing to particularly point out and distinctly claim the subject matter which Applicants regard as the invention. Specifically, the Office objects to the pre-existing pool of claim 1. Applicants have amended claim 1 remove that pre-existing pool limitation. Applicants respectfully submit that the claims are clear and respectfully request that the Office withdraw its rejection.

C. REJECTION OF CLAIMS UNDER 35 U.S.C. §103(a)

With regard to the 35 U.S.C. §103(a) rejection over Okano in view of Aoyama, Matsuda and/or Poger, Applicants assert that the cited references fail to teach or suggest each and every feature of the claimed invention. For example, Applicants submit that the cited references fail to teach or suggest that its invention works in conjunction with a device that is a wireless device for which a network address, mobile phone number or host name cannot be used as the device identifier. Rather, the cable box in Okano is assigned a DHCP address. To this extent, the address that is assigned in Okano is a network address. The claimed invention, in contrast, precludes a device for which a network address cannot be used. Accordingly, Applicants respectfully request that the Office withdraw its rejection.

Furthermore, with respect to newly amended independent claim 1, Applicants submit that the cited references fail to teach or suggest that the device identifier is dynamically generated by the server in response to the request. In contrast, the references cited by the Office use DHCP (i.e., a protocol that uses a limited number of addresses for a large number of devices) and the addresses are drawn from a pre-existing pool. To this extent, the device identifier of the cited references is not dynamically generated. Accordingly, Applicants respectfully request withdrawal of the rejection.

With respect to dependent claims 4 and 13, Applicants continue assert that the cited references also fail to teach or suggest that the correlation data includes a device type that is not the manufacturer and user data. In contrast, none of the references cited by the Office teaches or suggests this limitation. Accordingly, Applicants respectfully request that the Office withdraw these rejections.

With respect to the Office's other arguments regarding dependent claims, Applicants herein incorporate the arguments presented above with respect to the independent claims from which the claims depend. Furthermore, Applicants submit that all dependant claims are allowable based on their own distinct features. Since the cited art does not teach each and every feature of the claimed invention, Applicants respectfully request withdrawal of this rejection.

IV. CONCLUSION

In addition to the above arguments, Applicants submit that each of the pending claims is patentable for one or more additional unique features. To this extent, Applicants do not acquiesce to the Office's interpretation of the claimed subject matter or the references used in rejecting the claimed subject matter. Additionally, Applicants do not acquiesce to the Office's combinations and modifications of the various references or the motives cited for such combinations and modifications. These features and the appropriateness of the Office's combinations and modifications have not been separately addressed herein for brevity. However, Applicants reserve the right to present such arguments in a later response should one be necessary.

In light of the above, Applicants respectfully submit that all claims are in condition for allowance. Should the Examiner require anything further to place the application in better condition for allowance, the Examiner is invited to contact Applicants' undersigned representative at the number listed below.

Respectfully submitted,

Date: February 13, 2008
